ICLM Certification

International Certification in Lymphedema Management

Initial Course

The basic or initial course: As described in the brochure, this course provides the participants with the necessary knowledge to evaluate and treat patients with lymphedema and venous edema. (see course objectives in the brochure).

Full completion of this course is dependent upon successfully taking its final exam. This is a research-based certification course.

Level 2 Course

The level 2 course has been created to give the attendees the opportunity to review the manual lymph drainage and bandaging techniques according to the Leduc method and to learn about the treatment of several syndromes and symptoms of lymphedema.

This course is not a prerequisite for attendance to course level III or Advanced course.

Advanced Course

The Advanced course is taught by Professor Albert leduc, PT,PhD, Professor Olivier leduc, PT,PHD and and Anne-Marie Vaillant-Newman, PT, MA.

The program includes:

- Problem solving as related to primary and secondary lymphedema. Treatment (manual lymph drainage and multi-layered bandaging techniques) of head and face, genital, breast, trunk and limbs lymphedema. Treatment of venous edema.
- Review of the anatomy of the lymphatic system through the visualization of unique dissection slides of the lymphatic system.
- Presentation of the most recent research performed by the Leduc team in the fields of lymphology and phlebology.

ICLM Examination

The International Certification in Lymphedema Management can only be awarded to Physical Therapists, Occupational therapists and Medical Doctors.

At the end of the Advanced course, attendees will take the ICLM Examination. Successful attendees will be ICLM certified after completion of a case study. Basic course + Advanced course + the case study represent a total of 138 hours of training. Certified attendees will be listed as such on:
www.lymphedemamanagement.com & www.lympho.net
